SUMMARY

Technical seller with a CS degree who ships production software. Carry a ~$2M, 31-account industrial automation book (Eplan +30% YoY) and, as a founder, built a connected-machine platform and MetrIQs.

EXPERIENCE

Electro-Matic · Account Manager — Farmington Hills, MI | May 2024 – Present

- Manage a ~$2M, 31-account B2B book, from job shops to large OEMs such as Fori Automation.
- Own engineering-software sales company-wide across 5 territories (SE & West Michigan, Ohio, Memphis, Florida); grew Eplan 30% YoY ($130K → $170K) and sell Siemens simulation software.
- Grew one account 21x, $10.4K (2025) → $225K+ (through Sep 2026), via discovery and new applications.
- Run technical discovery with controls engineers and integrators to scope control panels, robotics, and injection-molding machine integrations, then turn requirements into proposals and quotes.

Pixelate Solutions LLC · Founder & Software Engineer — Remote | Aug 2024 – Present

- **MetrIQs (own product):** Shipped an MCP server (22 tools, OAuth via Clerk) so customers' own Claude, ChatGPT, or Cursor can query their data, run leak analyses, and set alerts; deterministic code does all the math.
- Led a FastAPI multi-agent backend: OpenAI Agents SDK, 5 specialists, typed evidence, 349 tests.
- **IIoT platform (client):** Built and shipped an Expo iOS/Android app, a 217-route Node/Express API, and a Next.js admin on Supabase Postgres (~130k LOC, 370 commits in 4 months).
- Built an AI support agent that answers from manuals and past tickets and auto-triages new ones.
- **Relay (client):** Shipped interactive messages (buttons, selection, invoices) across API, SDK, 7 agent runtimes, iOS.

Ally Financial · Mobile Software Development Engineer Intern — Detroit, MI | May 2023 – Aug 2023

- Built Ally Mobile UI in SwiftUI, React Native, and Jetpack Compose; presented research to executives.

SELECTED PROJECTS

- **Link**: Plaid finance app with rules-first LLM categorization, a REST API, and an MCP server.
- **Northstar**: Live AI trip planner: tool-calling edits with undo; Next.js web plus a native SwiftUI app.

SKILLS

Pre-sales: Discovery, demos & POCs, solution design, proposals & quoting, objection handling, forecasting
Build: TypeScript, Python, SQL, Next.js, React, Node.js, FastAPI, Expo, PostgreSQL, Docker, AWS, GCP
AI & APIs: OpenAI & Claude APIs, MCP, RAG, evals; REST, webhooks, OAuth; Plaid, Stripe, Shopify, QuickBooks

EDUCATION

Michigan State University · B.S. Computer Science, Minor in Business — East Lansing, MI | Jun 2024
